

Mohammed Albadry

Full-Stack Developer | Laravel • Vue • Nuxt

Cairo, Egypt | +201095840260 | mohammed.albadry.dev@gmail.com | GitHub | LinkedIn | website

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer & Team Lead with 9+ years building and leading development across multi-tenant SaaS systems, API-driven platforms, and integration-heavy applications in healthcare, fitness, logistics, e-learning, government, and marketplace domains. Proficient across the full stack — Laravel, PHP, Vue.js, and Nuxt.js — with hands-on experience in backend architecture, frontend implementation, server provisioning, and CI/CD workflows. Proven track record of leading cross-functional engineering teams, defining standards, mentoring engineers, and delivering scalable production-ready systems serving thousands of users.

PROFESSIONAL EXPERIENCE

Software Engineering Team Lead (Part-Time) 09/2023 – 03/2026

PRE-CAREER — SaaS Platforms (Fitness, Sports & Healthcare) | Remote, KSA

- Led a cross-functional web team of 11 engineers across UI/UX, frontend, backend, and QA for multi-tenant SaaS platforms.
- Reviewed code, assigned tasks, and provided technical guidance across all team disciplines.
- Architected payment integrations including Mada, STC Pay, and Moyasar.
- Integrated WhatsApp Business API, SMS, OAuth, and real-time communication workflows.
- Assisted in server provisioning and production environment preparation across AWS and dedicated servers.
- Screened, evaluated, and onboarded engineering candidates.
- Defined engineering standards and PR review practices across platform products.

Full Stack Developer 01/2024 – 11/2025

International Client | Remote, Netherlands

- Delivered a full e-learning SaaS platform end-to-end as sole developer — frontend, backend, server provisioning, and UI/UX.
- Built backend architecture from scratch including APIs, business workflows, and content delivery using Laravel and GraphQL.
- Implemented live learning features with WebRTC and real-time backend workflows.
- Designed UI/UX directly in code without design tools.
- Maintained production-ready deployment environments using Docker.
- Documented architecture, APIs, and workflows for long-term maintainability.

Full Stack Developer 11/2022 – 11/2023

MAZAADY | Remote, UAE

- Led the frontend team and contributed as Senior Backend Developer across multiple products.
- Developed APIs for iOS and Android merchant applications.
- Built and documented solutions for recurring codebase issues.
- Contributed to DoWorks online job platform and a government auction/bidding platform for the Saudi ministry.

Full Stack Developer (Backend-Focused) 03/2022 – 09/2022

SIDEUP — Logistics Aggregation Platform | Egypt & KSA

- Integrated 10+ shipping carriers, 5+ payment gateways, and multiple ERP and e-commerce platforms.
- Optimized backend performance supporting 500+ daily active merchants processing ~300,000+ orders/month.
- Developed mobile-facing APIs consumed by merchant iOS and Android applications.
- Implemented caching and performance optimization for high-frequency order workflows.
- Established reusable integration patterns improving maintainability across the codebase.

Full Stack Developer

02/2021 – 02/2022

AL WALID — Digital Agency | Remote, KSA

- Built full-stack systems and business tools for internal and client-facing platforms.
- Developed applicant screening and automation workflows.
- Delivered operational reporting and order management systems.

Freelance Full Stack Developer & Early Career

2017 – 2021

Various Companies & Clients | Egypt, KSA, UAE

- Delivered full-stack solutions across CMS, e-commerce, admin systems, and business platforms.
- Worked with Laravel, PHP, MySQL, Vue.js, and WordPress-based systems.
